

SKI CLUB CERN

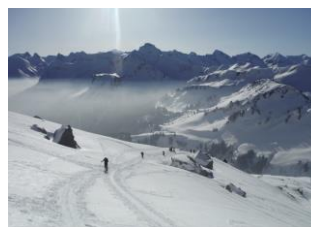

SKI

TOURING

2023/2024

<https://www.kananas.com/skiclubcern/activites/ski-de-randonnee/>

Outings

An average **25/30 outings in the season**, from the first weeks of **January to April**.

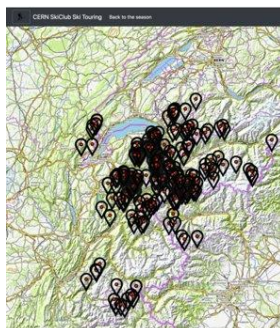

Different outings difficulties:

- **Easy (F,S1-2, <+800m)** - up to three hours of skiing up and mild ski down
- **Moderate (PD-/PD, S3, <+1100m)** - three to four hours of skiing uphill and sometimes interesting ski down
- **Advanced (PD+/AD-, S3 >+1100m)** - with more than four hours of the way up and a demanding ski down afterwards

Minimum ski level: 3.0/Easy black piste

Registration: every Thursday before scheduled outings (susceptible to adapt to conditions). Fair-share basis.

Check our previous years outings:

Safety

Compulsory Practice sessions on the avalanche rescue will take place on:

Sunday 7th January 2024

Saturday 13th January 2024

We offer exercises in small groups to familiarize with the avalanche safety equipment such as **Avalanche Beacon (DVA)/ Probe/ Shovel**.

Transport

We use our cars (usually two/three per outing) to get to the starting point. We aim in optimizing the number of cars by **car sharing from several starting point – CERN parking.**

Equipment

On top of the safety trio (DVA, probe and shovel) you need to have a dedicated skis and boots for performing the outings with us that consist of:

Skis with dedicated bindings that allow you to free you heel on the way up and lock it for the way down.

Skins that allow you to go up with skis.

Comfortable boots that have possibility to go up with a flexible mode and allow you to enable a stiff mode for the descent.

We do not rent any skiing equipment, however you can use the club's safety material for the outings with us.

For some **advanced outings** we may request that you will come with your own **crampons, harness** and some **glacier equipment**.

Contact

A team of seven certified and motivated instructors is waiting for you.
